

The New Age of Sound

ayon

Polaris II

"The Polaris II is one of the finest tube preamplifier made, regardless of price"

This tube preamplifier presents a new level of musical performance, 3D airy sound and construction quality among mid-priced vacuum tube preamps. It combines exceptional design and outstanding engineering, highest quality parts, best selected material and a never ending love for music.

Ayon Preamp Design

Ayon introduces a range of totally no-compromise vacuum tube preamps and presents a new radical departure from the current accepted pre-amp design philosophies.

All areas of design requirements have been thoroughly re-investigated with many new solutions being sought.

Using unique purist and innovative circuit topology, special signal tubes, absolutely best components, most of them are custom made to solve the problems of tube pre-amplifier design.

Our preamps represent a significant leap forward in sonic quality and sound performance over many other designs currently available.

We believe that these designs bring the listener to the closest impression of a live musical experience ever possible until now.

Each masterpiece is a true labour of love.

Specifications:

Class of Operation	Pure Class A, Triode-Pentode
Tube Complement Line	2 x Siemens C3M
Tube Complement Phono	4 x Siemens C3M
Tube Complement Power Supply	4 x CV135
Maximum Output (at 1 kHz)	40V rms
S/N ratio	> 96 dB
Input Impedance	> 1 MOhm
Output Impedance	30 Ohm
Frequency Response / Line	0.5Hz - 400kHz
Harmonic Distortion Line	< 0.01%
Harmonic Distortion Phono	< 0.1%
Input	5 x Line RCA, 1 x Phono MC
Output	2x RCA, 1x XLR
Dimensions Pre (WxDxH) cm	50x43x11 cm
Weight (Pre & Power Supply)	33 kg

Finish: black
